“FOX’ continues to impress us more each year. He is easy fleshing and has been an easy calver. He sires daughters with excellent dispositions and perfect udders. His bull calves have been thick and have shown excellent testicular development. We have used him with success on both heifers and cows.

We can never say enough about how ‘Ben’ has impacted our herd. He stamps his calves with a lot of style and natural thickness. His calves have a strong top and a lot of depth. His bull calves have excellent testicular development and are very docile. His daughters are broody, and have excellent capacity and milking ability. I don’t think we could ever have enough Ben daughters in our herd. Last year we retained a bull calf, we hope can carry on his sire’s tradition and reputation. These will be Ben’s last natural calves on offer this year.

Casesun is in the top 25% of the breed in 5 categories. The quality of his offspring will be invaluable as they excel in growth, milk, maternal qualities and scrotal circumference. Casesun suffered a serious foot injury in 2003, but has made a comeback to service some select females in a small pasture. We especially like the offspring from him and gelbvieh/angus females.

'LORNE' was purchased in 2004 to be used primarily as a heifer bull. We selected him sight unseen from Unger Land and Cattle's sale with confidence. He has turned out to be even better than just a heifer bull, and homozygous polled to boot. He has a strong pedigree with the proven Vale Country breeding on his sire's side and his dam comes from the same herd as Casesun.

‘Chad’ is a dark red, homozygous polled bull. We purchased him primarily as a terminal cross bull to produce moderate framed feedlot animals. He has served that purpose well. The daughters we have retained have calved easily and are excellent mothers. His bull calves have depth, thickness and docile temperaments.

We purchased ‘Kevin’ from the Wrangler’s Bull Sale in 2004. He has sired some excellent calves for us. They have had moderate birth weights, excellent growth and docile temperaments.
